## MPMS Release 2016\_2A - April 12, 2016

A new Transportation Alternatives Program (TAP) module has been created within MPMS. The screens within this module will be used to import approved TAP applications from SharePoint and to effectively track the costs and milestones of the TAP project. The following new screens have been created:

- TAP Project Summary
- TAP Project Costs
- TAP Project Milestones
- TAP SharePoint Import

A new **TAP Project Tracking** report has been created which will generate a report by application year, Planning Partner/District.

A new TAP search screen has been created in order to search for a TAP project using various search criteria. The search results can also be exported to Excel.
